as hack challenger**

**Registration deadline
30.05.2019 at 23:55
tinyurl.com/EnerKey2019**

**THE WINNER
GROUP WILL BE
REWARDED!**

YOUR DIGITAL “ENERGY MANAGER” AI / SERVICE ALGORITHM.

EnerKey digital “Energy Manager” is an industry given (and industry need driven) hackathon challenge, that will be connect to world’s largest ICT & sustainability conference ICT4S (www.ict4s.fi).

In this hackathon sprint, course participants race against each other (in teams) to produce their data visualization and/or vision of AI / machine learning enhanced service algorithm(s) / concept solution(s) for EMS systems of the future.

Finnish leading EMS solution provider EnerKey will be there to spar us, provide sample data from EMS systems and share some extra curricula activities too!

So gather your group of 2-4 persons or register as an individual and a group will be formed when we start 😊. All participants will be able to gain 3 or 6 LUT university master’s level credits into their studies and the best challenge responses will also be rewarded!
